

Hall Street (Kalamazoo Avenue to Sylvan Avenue) Road Design and Construction

A street reconstruction project is coming to your neighborhood this year on Hall Street from Kalamazoo Avenue to Sylvan Avenue. We held our first public design meeting for this project in June. We are writing to share the new street design. We invite you to contact us at the number or e-mail address below with any questions or concerns.

Prior to the project start, we'll send out another mailer and host a meeting to share construction preparation information. You received this letter because you are within 350 feet of the project.

Tentative Construction Schedule 2020

Engagement Summary

Through our meeting and survey, we heard support for:

- Improving the street crossing experience for people walking.
- Increasing on-street parking safety.
- Keeping existing street trees.
- Slowing traffic speeds.
- Removing parking on the north side of the street to add bicycle lanes on both sides of the street.

Preferred Design

The design described below was decided upon based on the input received through our meeting, online survey, and the City's Vital Streets Plan and Bicycle Action Plan.

This design will:

- Remove parking on the north side of the street.
- Install bicycle lanes on both sides of the street.
- Move the curb approximately 2 ft on both sides of the street to widen the street. The sidewalks will stay in their current location.

Business Guide

As we work to improve the street, we understand that businesses are sensitive to construction. For this reason, we created a guide containing information for businesses during construction. Please find this guide on our website or contact us to have a copy sent to you.

Para asistencia en español, marque 3-1-1 o 616-456-3000. | Persons needing accommodations for effective meeting participation should contact Community Engagement no later than one week in advance to request mobility, visual, hearing, interpretive, or other assistance.
